embracing immersion cooling technology to deliver high performance cloud services

about

PeaSoup is a "born in the cloud" cloud provider, formed to create a cloud service, designed and built with a fresh business and technology approach. Our main goal is to deliver an innovative, top-quality cloud environment that is entirely software-defined and exceeds the individual needs of our customers.

benefits for You

- ✓ High performance and resilience from liquid cooling technology
- ✓ High availability - delivered with flexibility
- ✓ Ready for your high demanding applications
- ✓ Reliable, scalable & sustainable cloud infrastructure
- ✓ Tier 3 aligned data centres powered by 100% renewable energy
- ✓ Simple & transparent pricing model
- ✓ 24/7/365 technical support
- ✓ 100% network uptime
- ✓ 100% data sovereignty

VMware Zero Carbon Committed™
PARTNERING FOR A SUSTAINABLE FUTURE.

s3 compatible cloud storage& (S3)

Ideal for unstructured data like backups, video, email, and files.

- ✓ Protects against ransomware.
- ✓ Low cost, £4.99 per TB/month, all inclusive.
- ✓ 90% cheaper pricing than AWS without compromising on performance and quality.
- ✓ Data is protected both in transit and at rest, ensuring that it remains safe from unauthorised access.
- ✓ Fast data access and retrieval times.

https://peasoup.cloud/s3

cloud backup & recovery (BRaaS)

Protects businesses against user and software errors, hardware failure, any security breaches, malicious deletion, theft, cybercrime, natural or technology disasters.

- ✓ Low cost, based on a per GB basis only.
- ✓ Air-gapped protection from ransomware encryption, viruses and malicious deletion.
- ✓ Additional automated temporary backup quota increases with no additional charges.
- ✓ Backup copy jobs to a dedicated PeaSoup data centre, fully compliant to the UK Gov data protection guidelines (NIST and CESG/NCSC).
- ✓ Full visibility and control of the off-site backups from your local Veeam console.

https://peasoup.cloud/braas

disaster recovery (DRaaS)

Protects brand, loss of revenue and loss of customers.

- ✓ Protects against disasters and logical failures.
- ✓ No additional outbound charges for failback to live system.
- ✓ Minimal disruption and downtime with low Recovery Time Objectives (RTOs).
- ✓ No performance degradation of production databases, applications and transactions.

https://peasoup.cloud/draas

infrastructure as a service (IaaS)

Provides highly scalable infrastructure for applications, data and security.

- ✓ Cloud infrastructure based on a modern hyper-converged architecture.
- ✓ Complete cloud service (virtual data centre) under your control - firewall rules, including NAT, site-to-site VPN, Client to site SSL-VPN, load balancers included as standard.
- ✓ Full Virtual Machine (VM) hardware administration with "hot add" CPU, RAM, storage and network capabilities providing instant additional resource.
- ✓ Quick provisioning with an upfront and transparent fixed monthly cost.
