

“ Utilising our on-premise Veeam backup and replication solution for local backups, we setup PeaSoup as a cloud services provider enabling us to create a “cloud repository” and seamlessly get backups offsite. ”

Robert Doubtfire - Network Manager

The Customer

Highworth Grammar School
Maidstone Road
Ashford, Kent
TN24 8UD

The school motto is to encourage their students to do and at Highworth we promote a community where all members are:

Reflective - creative and innovative
Eager - for life-long learning
Aiming - to achieve their full potential
Considerate - confident, independent individuals
Happy - in a caring, respectful community

About PeaSoup

PeaSoup is an award-winning cloud company providing cloud services, including backup and recovery, disaster recovery and infrastructure as a service, that are simple to implement and offer an unrivalled level of performance, from hyper-converged architecture and Tier 3 datacentres, reliability and stability and based on a leading-edge immersed IT infrastructure.

Data protection with backup & recovery for a grammar school

The Challenges

Working within the educational sector, offsite data protection is essential but heavily constrained by budgeting. Having identified vulnerabilities in the physical aspects of the environment, an offsite cloud backup target was required to achieve low-cost protection with high reliability of recovery.

- Solid backup and recovery solution needed for school servers.
- Ability to access and use applications without disruption or slowdowns when backup running.
- Education budget limitation.

The Solution

PeaSoup has implemented Veeam backup and recovery service. Built specifically for VMware vSphere and Hyper-v environments, Veeam combines backup and replication and rapid VM recovery in one cohesive solution.

- User friendly and visual Veeam backup console.
- Fast incremental backups enable for more frequent backups.
- Enhanced data protection and GDPR compliance.
- 3TB of vDC storage space from PeaSoup

The Outcome

Full-featured and easy-to-use Veeam backup solution at a relatively low-cost with 3TB storage space with unlimited bandwidth from PeaSoup. Ability to perform reliably test recovery knowing Highworth school data is safe and fully protected continuously.

- 24/7 access to mission-critical school systems.
- Fast and frequent backups help school to achieve a low-cost business continuity protection
- Veeam's provide instant (in minutes) recovery from backups. Protects against natural and technology disasters, malicious deletion and cybercrime.
