

Customer Case Study

“From the initial conversation, on-boarding process, developing the service and responding to support requests, PeaSoup provided nothing but great service.”

Kevin Lane - Network Manager

The Customer

West Park School

West Road
Derby
DE21 7BT

West Park School is a large mixed secondary school located in the Spondon area of Derby which gained Academy status in 2011. The school was formerly known as Spondon Park Grammar School.

“A caring school where we put pupils and their achievements first”

Derby school achieve robust and cost-effective data protection

The Challenges

West Park School has recently undergone further expansion with increases in pupil numbers, and IT infrastructure build to accommodate the increase in pupil intake. The school were using Veeam Enterprise Edition for local backups to Network-Attached Storage (NAS). With the increase in data, the school main concern was having only a local backup as a business continuity plan. That wasn't providing robust and fail-safe data protection in the event of technology and/or natural disaster. Equally with budgets in education under scrutiny, West Park School were looking for a cost-effective solution.

- Robust and fail-safe backup & recovery solution as part of the business continuity plan.
- Cost-effective solution.

The Solution

PeaSoup supplied an easy to provision Veeam Cloud Connect backup and recovery solution providing SSL encrypted connection into an encrypted cloud repository. This provided West Park School with the desired security of an offsite repository enabling to control it from Veeam Management Console and acting as though it was a local backup.

The Veeam backup & recovery service setup and provisioning took less than 15 minutes and West Park School were able to protect their data across easily and swiftly.

- User friendly Veeam Cloud Connect backup and recovery as a service.
- Free 30 days trial prior installation.
- Robust data protection and GDPR compliance.

The Outcome

West Park School has the security of an offsite encrypted cloud repository to ensure data protection should problems ensue locally. Additionally, Veeam Cloud Connect solution is based purely on the repository size at a competitive price per GB and unlimited data transfer bandwidth, the monthly costs are well within their budget. PeaSoup predictable pricing, with no lengthy contracts and no hidden costs, provides the budget control the education sector require at present.

- 24/7 data protection with the ability to recover fast.
- Fast and frequent backups help West Park School to achieve a low-cost business continuity plan.
- Robust protection against natural and technology disasters, malicious deletion and cybercrime.
