

## What Do Legal Firms Care About?

- Keeping fee earners earning
- Brand protection
- Critical applications: Case Management System, Email servers

## WHAT ARE THEIR DR PROBLEMS?

- Downtime on case management and email systems stops all business operations
- Loss of data has direct impact on volume of billable hours
- Increasing threat of Ransomware attacks
- Traditionally small IT teams working on limited resource and multiple point solutions

## POSITIONING THE ZERTO SOLUTION

Zerto works with a number of legal firms to ensure resilience and enable their fee earners continue earning

- Through continuous replication, Zerto's typical RPO is measured in seconds, ensuring minimal data loss to mission critical applications and eliminating the loss of billable hours from Case Management Systems.
- Zerto helps to mitigate the threat of Ransomware attacks by enabling you to rewind to any valid point in time, removing the possibility of losing billable hours worth of data by resorting to restoring backups.
- In the event of a disaster, Zerto's integrated, orchestrated failover process ensures that case management systems and email servers are recovered on a secondary site within minutes, ensuring application resiliency.
- Zerto is non-intrusive, deploys in under 2 hours without professional services and simplifies the management of business continuity with a single pane of glass on your entire estate.
